

Donate a mineral

The Mineral and Rock Collection of the Eötvös L. University, host and main supporter of MECC2010, serving research and teaching since 1774, kindly asks the participants of MECC2010 to help the development of the collections by donating mineral, rock and ore specimens.

Currently, due to our limited funds, donations are the main acquisition source of the Museum.

Spectacular and/or rare specimens, representing your country, and/or samples of your research (well-documented, published) and/or specimens you just like are all welcome and thanked.

Donations will be exhibited in a frequented place of the MECC2010, with the name of the donator.

When preparing the donation, please provide us the following data: name, exact locality, collection / acquisition date, published references (if any) and any additional information you want to share with us.

Greatly appreciating your donations,

Erzsébet Tóth
Curator of the Mineral and Rock Collection

Tamás G. Weiszbürg
Director of the Museum
